Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-18 and 21 are rejected under 35 U.S.C. 102(a) as being anticipated by Izawa et al., JP 11-102894A.

The rejection is maintained as stated in paper #9 mailed 10-2-01 for the reasons of record.

Response to Arguments

Applicant's arguments filed 3-4-02 have been fully considered but they are not persuasive to overcome the rejection under 35 USC 102(a) using the Izawa et al., JP 11-102894A reference. However, due to applicant's amendments to independent claims 1, 8, 10, and 17-18, the rejection under 35 USC 103 using the Lymberopoulos et al. reference and Admitted prior art has been withdrawn.

With respect to Izawa et al., a machine translation of the reference from the Japanese Patent Office website is provided. Clearly, the spacings and frequencies claimed are shown (for example, see paragraph 30 where the spacing is 60mm and the frequency is 450 MHz). With respect to the overall structure being etched, note that this is suggested in paragraph 2 of the translation. Regarding applicant's argument that the

Izawa et al. reference fails to disclose that the generating amount of CF_2 and F are reversed from each other, note that these features are not being claimed. Additionally, although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Furthermore, the fact that applicant has recognized a feature that is inherent in the prior art reference does not make the claims patentable.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
